

På de etterfølgende sidene finner du følgende dokumenter:

* COM/DCOM moduler for forskjellige former for datakryptering, inkludert PKI-teknologi, dataoverføringer som FTP, HTTP, mail, fileupload.

* Java Beans for utvikling av funksjoner som kalender, presentasjon av grafer, rapportgenerator m.m.

Build Apps @ Speed of Internet

VisualSoft Technologies is an acknowledged market leader in COM/DCOM Components. These Components are customizable. Developers and end-users alike have been delighted after using VisualSoft Components. These Components save valuable time for developers while building their applications. Being robust in architecture and scalable they can be incorporated in your applications without bother.

VisualSoft WebDev

Add performance to your web apps

VisualSoft WebDev is a suite of 9 power packed tools that you will find to be handy while developing interactive Web applications. Your messaging needs, HTML file transfers, encrypting and decrypting requirements are all met with these COM / DCOM components.

The components in this Suite include

VisualSoft FTP, VisualSoft HTTP, VisualSoft FileUpload, VisualSoft Mail, VisualSoft Validator, VisualSoft DataManager, VisualSoft Currency Exchange, VisualSoft Calci and VisualSoft VirtualDir.

VisualSoft Crypt won Software Development Magazine's **Jolt Productivity Award** in the category of "Libraries, Frameworks and Components". The Jolt Awards were announced by CMP Media's Software Development Magazine recently at Software Development West Conference and Exposition at San Jose, CA.

VisualSoft NetDev

Add Powerful Networking functionality to your apps

VisualSoft NetDev is a bunch of 21 developer end components that facilitates the development of interactive applications in the areas of Internet, Intranet and E commerce. These power packed components have been built on robust architecture and support popular IDEs such as VisualBasic, Delphi and C++.

The components in this Suite include

VisualSoft FTP, VisualSoft HTTP, VisualSoft emailValidator, VisualSoft Encode, VisualSoft Finger, VisualSoft Mail, VisualSoft FileUpload, VisualSoft Socket, VisualSoft NNTP, VisualSoft MAPI, VisualSoft DNS, VisualSoft Gopher, VisualSoft SNMP, VisualSoft IMAP, VisualSoft RAS, VisualSoft Translate, VisualSoft LDAP, VisualSoft TelNet, VisualSoft URL Validation, VisualSoft TFTP and VisualSoft MIME .

VisualSoft Crypt - Award Winning Component*

Build your apps with strong security layer

Crypt provides security to sensitive data in your application. It provides encryption and decryption using standard cryptographic algorithms like DES, Triple DES, Blow Fish, IDEA. It has both stream cipher and block cipher algorithms. The component can encrypt and decrypt plain text as well as files of any format. It also supports MIME encryption.

Run on  platform

Build Apps @ Speed of Internet

VisualSoft FTP

Add File Transfer Power To Your Apps

VisualSoft FTP is a client side COM component that can connect to a FTP Server and provide all FTP related functionalities. The component is robust and feature enriched. The component can detect network error resulting to file transfer failures and can also resume file transfer. The component supports firewall authentication and transfer files through HTTP proxy servers. Supports Netscape and Microsoft HTTP Proxy server. It can transfer multiple files from database and supports wildcards.

VisualSoft DataManager

All in one: Data Access, Data Storage & Data Reporting

This component lets you cut through the complexity of large database applications with fast and flexible drill-down capabilities and rich report features, for easy storage and retrieval of data. DataManager makes it easier than ever for you to build scalable data application which can be developed using flexible interfaces for accessing them.

VisualSoft Mail

Add powerful messaging capabilities to your apps

Mail is a COM component that can be used to send mails and retrieve mails from mail servers. It is compliant with SMTP and POP3 protocols. The component can send mails in Plain text, Rich text and HTML formats. It can be used to send mails with Digital signature and encryption. It supports S/MIME. The component can also be used to upload attachment files from client machine

VisualSoft Validator

Increase your performance, Reduce your design testing life cycle

Validator is used for validating the values entered by the End-user. This is a front-end validation component that validates fields such as E-mail address, URLs, Zip codes numeric, Date and Credit Card numbers.

VisualSoft HTTP

Web enable your Enterprise apps

Retrieving pages, submitting forms, automating web-based activities, — all become easy with VisualSoft HTTP. Your web-based applications (VBScript, ASP, etc.) will download faster with this COM component that can also be used in Active Server Pages (ASP) or in any COM environment. This COM component can be used to connect to any HTTP Server and retrieve pages. It supports all the HTTP commands. It allows offline viewing and works with HTTPS

VisualSoft Cart

Increase your service by adding e-commerce function

Is a COM component that allows users to create a shopping cart. Any web developer can use this component to hold data like Product SKU, CustomerID, Discount on a product, total amount spent etc. It provides flexibility to add, remove, modify or retrieve this information. The user can save cart contents to XML, HTML, Text files and also to the Database. The component has an integrated mail facility for sending email to customer upon purchase.

VisualSoft FileUpload

Enhance Your FileUpload Functionality

VisualSoft FileUpload is a Server Side COM component, that can be used to upload files from any client machine, to a Web server (supports IIS, Apache, O'reilly, Netscape enterprise server and Fasttrack Server using Chili ASP). The Component can upload files to databases, virtual directory, as well as to memory. It can also download files.

Build Apps @ Speed of Internet

VisualSoft Technologies is an acknowledged market leader in Java Beans and products. Developers and end-users alike have been delighted after using VisualSoft Java Beans. These Beans save valuable time for developers while building their applications. Being robust in architecture and scalable they can be incorporated in your applications without bother.

VisualSoft JBPro

Build Productivity apps for your businesses

You can easily and quickly enhance your Java application's user interface with this collection of components. VisualSoft JBPro Suite provides Java developers with a pack of highly customizable Beans that can be used to add rich functionality to Java applications. Right from a simple colorpicker for your GUI solutions to complex scheduling and charting, managing tasks to data tabulation, these Java components are compatible with leading IDEs such as VisualCafe, VisualAge Java, JBuilder, Forte For Java, JDeveloper etc. VisualSoft JBPro Suite will save you time and cost in developing your applications.

This suite includes

VisualSoft JBProjectGantt, VisualSoft JBScheduler, VisualSoft JBCalendar, VisualSoft JBChart, VisualSoft JBGrid, VisualSoft Tree, VisualSoft JBList, VisualSoft JBSpin, VisualSoft JBTab and VisualSoft JBColorPicker.

VisualSoft FlexiReports

Add intelligence to your information

Meet the fact head-on. There is no gainsaying the fact that all positions in any organization entail report submission. You may be a CEO or a marketing vice president or a member of the sales team, you would have to submit reports to the boss above. Right. Make this repetitive mundane task easy and as interesting as possible with VisualSoft FlexiReports.

VisualSoft FlexiReports is not just another report generator. It brings you never before supported features to add to your reports. It gives you options of several report types. A heavy function loaded 'Expression Editor' for all your mathematical equations, formulae and calculations.

VisualSoft FlexiReports is a tool that can be used both by the beginner and the expert. Don't be surprised VisualSoft FlexiReports now supports your imagination fully.

Creating reports will now be fun!

Build Apps @ Speed of Internet

VisualSoft JBScheduler

Build powerful time & task management apps

JBScheduler provides a flexible interface that can be customized and used in the development environment. The best feature of the component is 'easy-to-use' and helps track all schedules and contacts. It can be customized to track appointments, prioritize tasks and schedule events. Different reminders for appointments, events and tasks can be set. With JBScheduler information can be arranged in different tab views - Daily, Weekly, Monthly or Yearly. The Address Book can be used to maintain business and personal addresses separately. It has a built-in Memo Manager to conveniently store important information. It is now available in both AWT and swing version .

VisualSoft JBGrid

Enrich your apps with multiple data display feature

JBGrid is a Java Bean for displaying data in a tabular format. Its efficient memory management enables the user to add any number of cells using a variety of methods. It can be customized for type, color and font size. It can also accommodate other Java components inside the cells. Supports customizable gridlines, grid foreground, background colors, grid font, row height, row width, intercell spacing and row margin. It is now available in both AWT and swing version.

VisualSoft JBChart

Power your business presentations in the feature rich charts

JBChart is a fast and robust Java Bean that helps develop sophisticated graphs and charts easily and quickly. JBChart can be integrated with any Java Bean compliant IDE and can also be embedded in an applet for use in any Java 1.1 enabled browser. Multiple chart styles to present a given set of data can be produced. Bar, line, pie, or area type charts representation becomes easy. This component offers a customizable Property Editor and a tool tip. Now available in both AWT and swing versions.

VisualSoft JBCalendar

Enrich calendaring capabilities of your apps

JBCalendar is the right component for your applications such as PIM, project management tools or e-business. It is a highly customizable Java Bean that has an easy to use interface, configurable colors, size and supports several fonts. It has multiple date formats and supports background images for the calendar. It can be set for monthly, quarterly, half yearly or yearly views. It is now available in both AWT and swing version.

VisualSoft JBProjectGantt

Build your PMI Application with ease

JBProjectGantt is a multi-feature Java Bean that consists of Grid and Graph for managing tasks. JBProjectGantt comes with a host of customizable features that facilitate the building of highly creative applications that require date-sensitive information. A user can enhance efficiency with this component for displaying project tasks and status while planning for a project. All tasks can be Added, Edited or Deleted as desired. The Grid consists of rows and columns with headers. It displays row numbers for every row added to the grid. The Graph reflects the proceedings of tasks that are in the Grid. Data can be represented in a tabular form. The status of the entries made in the Grid is displayed in a graphical manner. It is now available in both AWT and swing version.

VisualSoft JBTree

Enrich user navigation

JBTree is an easy-to-use tree component that helps customization of the contents in a hierarchical manner or tree style. It is a multi-featured Bean that facilitates versatile controls of interfaces and applications.

It also supports internationalization, it can work well with any Java IDEs. It facilitates adding, modifying and deleting nodes to parents and expanding & collapsing the tree. Displaying different images for folders is also enabled. It is now available in both AWT and swing version .
